Argo App

Argo is a free mobile and social navigation app developed by Jeff Foulk, a local boater out of Havre de Grace, MD. The app is intended as a social platform to connect with others while out on the water, plan trips with fellow boaters, learn about popular boating spots and read reviews, and even log voyages and share them with family and friends. The app also has some navigational features so that you can plan the quickest and safest route, customized for your boat. Argo is currently in Beta testing, available for both iOS and Android, and it needs boaters like you to try it out so that features can be refined and added based on the user experience. Learn more at argonav.io.

Courtesy of SeaClutch

SeaClutch

The SeaClutch is a patent-pending product which holds picture frames on your boat or RV securely in place. The SeaClutch attaches to horizontal surfaces with an adhesive that won't harm your interior, and securely holds most standard size picture frames, eliminating the need to store them when getting underway. **Tent F18;** seaclutch.com

YOU ARE CLEAR FOR DOCKING

Remotely Activate Your Dock or Marina Slip from 1 NM Away

- Turn on Dock/Slip Lights
 - Lower Boat Lift
- Easily Navigate Docking
 - And more...
