Here's what we've got for you this week:

- **What's New:** Argo 3.0 Beta is Out
- **On the Blog:** Top 10 Annoying (and Often Dangerous) Boating Mistakes
- **Community Spotlight:** Help Us Pick Our Next Argo Live Guest
- **Argo Live:** Join us March 12 at 7 PM ET
- **Quick Tip:** Bridge Ahead? Check the Distance in Seconds

What's New this Week

Argo 3.0 Beta is Out

Argo 3.0 represents the biggest rebuild in our history. Under the surface, the app has been reengineered to deliver faster chart performance, smoother navigation, and the foundation for the overlays we've been previewing.

In this first beta, you'll notice:

- A refreshed chart experience in 2D and 3D
- Faster, smoother overall performance

And now the rollout phase begins. Wind overlay is up next. With the new 3.0 foundation in place, these features can begin arriving rapidly.

Open the app, explore the new experience, and stay tuned.

On the Blog

Top 10 Annoying (and Often Dangerous) Boating Mistakes

Think you're boating "carefully"? Some of the most common habits on the water are quietly dangerous. From why a "slow" pass can make a bigger wake to how a casual VHF call can become official record, these 10 mistakes shared might surprise you. Read before your next trip.

Quick Tip

Bridge Ahead? Check the Distance in Seconds

Open Argo and tap the ruler icon in the top right corner to launch the Distance Tool. Drag the two pins to measure from your current position to the bridge or any point ahead.

Know exactly how far you have to go before you get there.

See it in Action

BOAT BETTER TOGETHER

Argo is an easy-to-use navigation & boating app.
