Here's what we've got for you this week:

- **What's New:** See Key Trip Data On Every Route Segment
- **On the Blog:** Argo 3 Is Here: Faster Navigation, Clearer Charts...
- **Community Spotlight:** Join Argo's Facebook Group
- **Quick Tip:** Understand the Icons on Your Map
- **Partner Spotlight:** Offshore Connectivity at Competitive Prices

What's New this Week

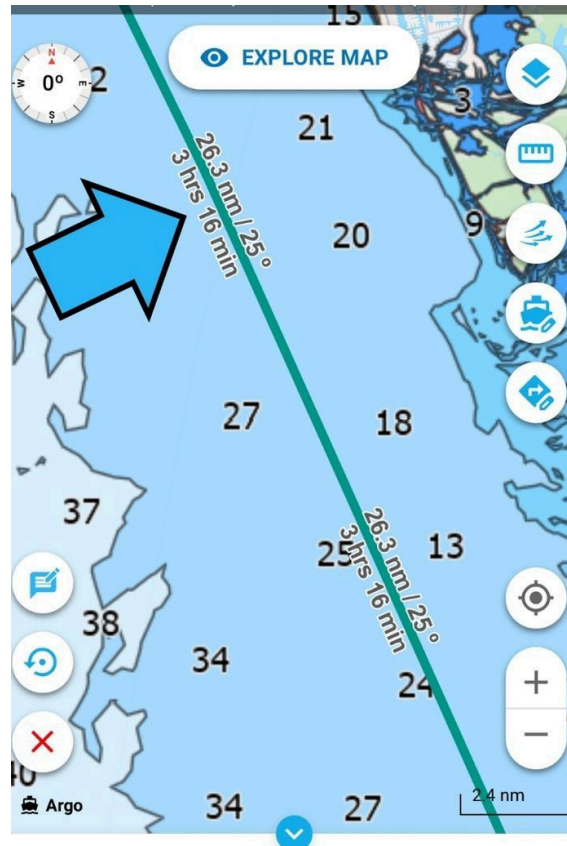

See Key Trip Data On Every Route Segment

Get more insight at a glance.

Route segments now show key trip data like distance, heading, and estimated time directly on the map, so you can better understand each leg of your journey without much work.

This tool makes it easier than ever to plan and navigate with confidence.

Try it on the Mobile App

On the Blog

Argo 3 Is Here: Faster Navigation, Clearer Charts, and a Smarter Foundation

Marine navigation has come a long way from paper charts and handheld compasses, but digital tools haven't always kept pace with what boaters actually need on the water. Too often, navigation apps offer more data than clarity, presenting users with dense, overlapping information when what they need most is a fast, accurate read of their surroundings.

That gap between data and understanding is exactly what Argo was designed to close.

Quick Tip

Understand the Icons on Your Map

Did you know we have an Argo Map Legend? It explains key icons such as report pins, buoys and other navigational aids.

You can also tap any icon directly on your map to get more details about it, so you always know what is around you while you are on the water.

Click the button below to view the full legend or find it anytime in the Main Menu of your Argo app.

Type of Buoys

Lateral Buoys

These aids show the sides of a navigable channels.

Partner Spotlight: Satellite Technical Services (STS)

Offshore Connectivity at Competitive Prices

Satellite Technical Services (STS) provides competitively priced marine electronics and satellite communication solutions for vessels across the Pacific. With coverage from Alaska to California and retail dealers in key ports like San Diego, Honolulu, and Dutch Harbor, STS helps boaters stay connected offshore with reliable, accessible equipment.
