Here's what we've got for you this week:

- **What's New:** Redesigned Tablet Experience
  - **Quick Tip:** Plan Your Fourth of July Trip Now
  - **Community Spotlight:** Robert Youens' Sea Trial
  - **On the Blog:** Get to Know Our Team: Alexis Naveros
-

### What's New this Week

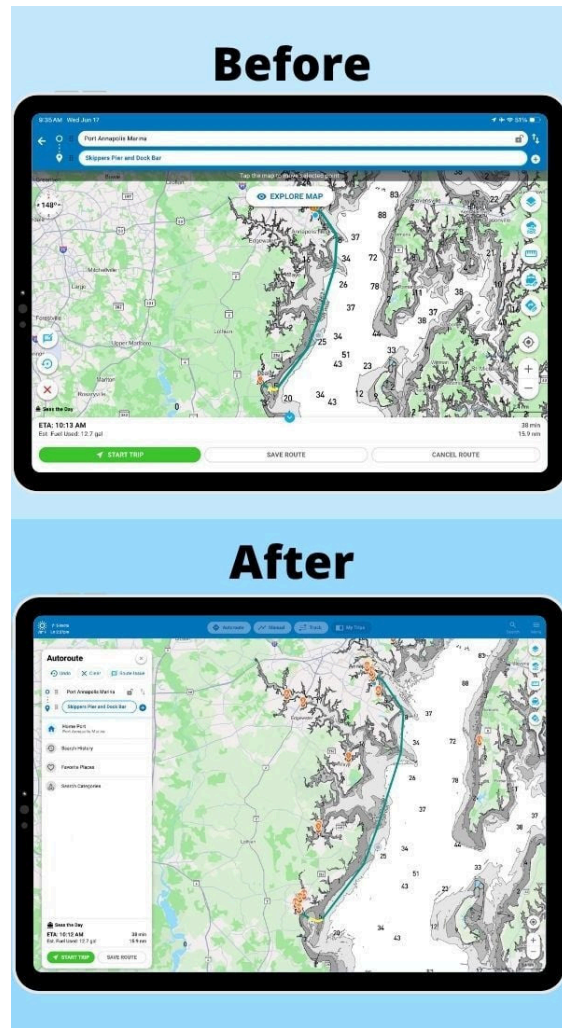

# Redesigned Tablet Experience

We've redesigned Argo for tablets. Instead of stretching the phone experience onto a bigger screen, we've reimagined the layout to take full advantage of your display.

This is a huge upgrade for tablet users. It means more room for maps, navigation, and the information you need most, all in a sleek, intuitive interface.

Watch the video below to learn more about what's changed.

### Other New Features:

- Added the ability to search for navigation aids (mile markers, buoys, beacons, current/tide stations)

### Quick Tip

## Plan Your Fourth of July Trip Now

Fourth of July boating starts with a plan. Before the holiday rush, use Argo's Web App to map your route, save places to stop, and plan fuel and overnight stays. Your trip will automatically sync to your phone and be ready when you hit the water.

## Community Spotlight

# Robert Youens' Sea Trial

Have you heard of Robert Youens?!

Last year, Robert set the solo Great Loop speed record by completing the roughly 6,000-mile journey in just 19 days, 13 hours, and 1 minute aboard a jon boat. This July, he's attempting to beat his own record.

He's used Argo this past week during his sea trial. Stay tuned to find out how to follow along for his record breaking attempt.

## Get to Know Our Team: Alexis Naveros

Ever wonder who's behind Argo's maps and routing? Meet Alexis Naveros, Argo's first team member and senior programmer. From processing billions of depth data points to creating entirely new algorithms for fun, Alexis has helped shape the technology that powers your experience on the water.
