Weather on the Water: What Boaters Need to Know

A forecast that looks great for a backyard barbecue may leave out some of the information that matters most on the water.

For boaters, 78 degrees and sunny only tells part of the story. Wind, waves, currents, tides, visibility, thunderstorms, and changing conditions can all affect a trip. Just as importantly, those conditions may not be the same everywhere along your route or stay the same throughout the day.

That is why weather should be part of planning where you are going, not something you check once before leaving home.

Track Art Competition

Need some inspiration?

Here's one of the creative tracks we've seen so far. Think you can top it?

There's still plenty of time to create your own and enter the Argo Track Art Challenge. Just record your track, share a screenshot with #ArgoTrackArt, and have fun with it.

Quick Tip

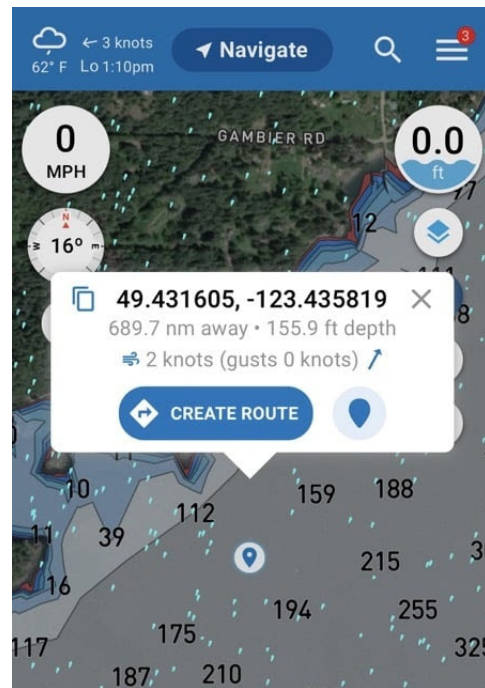

Check wind at a specific location

Want to know the wind at a specific spot?

Turn on the Wind overlay, then long-press anywhere on the map to see conditions there.

You can also center the map on a location and tap the weather icon to check its forecast.
