Here's what we've got for you this week:

- What's New: See How the Tide Is Affecting Depth
- On the Blog: How to Sell a Boat: Sentiment vs. Market Reality
- Community Spotlight: Meet David Bencaz.
- Quick Tip: Switch Up Your Base Map
- Argo Live: Join Us September 10 at 8 PM ET

What's New this Week

**See How the Tide Is Affecting
Depth**

Argo's Depth Gauge shows the charted depth for your location based on the waterbody and the charting agency. For coastal areas, NOAA uses Mean Lower Low Water (MLLW), and as most of you know, the water level can change with the tide.

Turn on Tide Variance in your Depth settings to see how the current water level compares with MLLW, plus whether the tide is rising or falling.

The example above indicates the water is 2.7 feet above MLLW and rising based on the nearest NOAA tide station.

On the Blog

How to Sell a Boat: Sentiment vs. Market Reality

Thinking about selling your boat? It can be tempting to tackle upgrades and projects before listing, but more spending doesn't always mean a higher sale price.

See what actually matters to buyers — from condition and presentation to pricing, carrying costs, surveys, and knowing when to leave well enough alone.

Community Spotlight

Meet David Bencaz

1,000+ nights camping. 48 states.
Plenty of time on the water.

David knows his way around the
outdoors and the water.

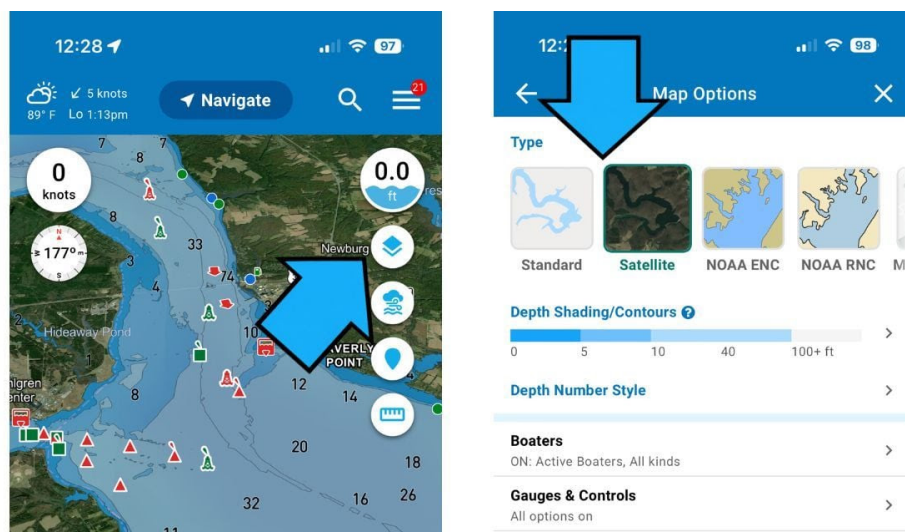

We asked David about his
favorite places to boat, where he
likes to stop, and the Argo feature
he uses most.

Quick Tip

Switch Up Your Base Map

Different trips call for different map views.

Argo lets you switch between several base maps depending on what you want to see.

Tap the Map Options button on your map, then choose from options like Standard, Satellite, Terrain, NOAA ENC, NOAA RNC, and more.

Try a few and find the view that works best for your trip.
