Here's what we've got for you this week:

- What's New: High-Definition USACE Surveys
- On the Blog: Tides and What Paper Charts Got Right
- Contest Winner: Meet Our Track Art Winner
- Quick Tip: Keep Your Boat Centered
- Argo Live: Watch the Replay
- What Boaters Are Saying: "Absolutely Love It"

What's New this Week

See the Latest USACE Surveys in More Detail

USACE survey data in Argo is getting a clearer, more detailed view.

You can now see surveys in high definition and filter them by survey age, making it easier to tell how recent the data is.

This release covers the East Coast, with inland rivers coming next. The data will also update automatically, ensuring you always have the latest USACE survey data within Argo.

Watch How It Works

On the Blog

Tides and What Paper Charts Got Right

Tides can change the amount of water beneath your boat by several feet, but charted depths need a consistent reference point.

“This week, we’re breaking down Mean Lower Low Water (MLLW), how tides affect the water beneath your boat, and why understanding chart datum and tide variance can help you make better sense of the depths you see on the chart.”

Argo Track Art Winner

And the Winner Is... Kurt Schuler!

Our team has picked the winner of the Argo Track Art Contest! Congratulations to Kurt Schuler for creating this awesome shark-shaped track.

Thanks to everyone who got creative on the water and sent in their track art. We had a great time seeing all of your entries!

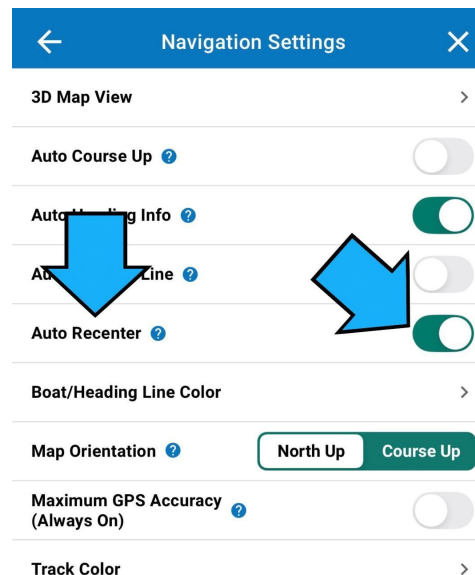

Quick Tip

Keep Your Boat Centered Automatically

Have you been navigating when your boat cursor moves off the map? To avoid that, simply keep your boat cursor centered using the **Re-center button**.

Want Argo to do it for you? Turn on **Auto Recenter** in Navigation Settings and Argo will automatically re-center the map after about seven seconds.

Argo Live

Missed Argo Live?

Couldn't join us last week? Catch the replay and hear about the latest Argo features, boating updates, and more.

What Boaters Are Saying:

One of our Argo users gave us five stars and called out customizable depth curves, seeing where safe water is, and pre-planning routes as some of their favorite features.

Thanks for the great review and for boating with Argo!
